

The Butler Trolley

Product Features

The butler trolley is designed to serve guests in suites where there is a table and chairs for dining.

This trolley was designed with a hotbox and wine storage. There is extra space available for storing linen or drinks. They can be designed with an insulated area where frozen deserts or drinks can be moved to the room.

The trolley is made out of stainless steel and fitted with a wood cladding, if you so choose the stainless steel trim can be retained or the frame can be covered with a wood veneering.

The colour can be changed to anything you require for the trolley to fit in with the rest of the hotels aesthetics.
